-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group 3 in the reply filed on 6/12/07 is acknowledged.

Allowable Subject Matter

Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Art Unit: 3738

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 13, 16, 17, and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Hellberg (2002/0165619).

Referring to figure 4, Hellberg teaches:

13. (Original) A light prosthesis as a visual substitute for a missing limb, comprising: a shaped body for replacing the missing limb comprises a socket for connecting the prosthesis to a stump of the missing limb, wherein the shaped body is made of a light synthetic material, and that the periphery of the socket for connecting the prosthesis to the stump is variable.

16. (Original) The light prosthesis of claim 13, wherein the length of the socket (2) is variable. The variable length is due to the folds in the rear of the socket as shown.

17. (Original) The light prosthesis of claim 16, wherein the socket (2) is made of an elastic material at least over a partial region of its length, and that the elastic material forms at least one pleat (7) in the partial region to achieve a change in the length of the socket (2).

19. (Original) The light prosthesis of claims 13, wherein the shaped body (1) includes a joint or several joints to replace the joint(s) of the missing limb. See at least paragraph 0003 teaching an entire leg which inherently includes an ankle and possibly a knee joint.

Claims 13, 16, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Telikicherla (5,651,792).

Referring to figures 10-11, Telikicherla teaches:

13. (Original) A light prosthesis as a visual substitute for a missing limb, comprising: a shaped body for replacing the missing limb (see at least figure 1) comprises a socket 116 for connecting the prosthesis to a stump of the missing limb, wherein the shaped

body is made of a light synthetic material, and that the periphery of the socket for connecting the prosthesis to the stump is variable.

16. (Original) The light prosthesis of claim 13, wherein the length of the socket (2) is variable. Note the end cap 125 can be adjustably attached using straps 126. Also see 9:50 et seq.

19. (Original) The light prosthesis of claims 13, wherein the shaped body (1) includes a joint or several joints to replace the joint(s) of the missing limb. See at least figure 1.
